

KL 418 aérosol

Security degreaser according to nuclear standards

Description

Cold grease remover, composed of a synergetic mix of solvents, intended to replace chlorinated hydrocarbons. KL 417 contains less than 200 PPM in sulfur and halogens (chlorine and fluorine); therefore, it responds to the P.M.U.C. nuclear specifications.

Applications

Specially adapted for use in a degreasing fountain. Ideal for degreasing electrical equipment thanks to high dielectric strength.
