

HYDRO 68 AL

Food quality hydraulic oil

Description

Comprised of highly-refined mineral-base oils and specific additives. Approved by NSF on the requirements of the FDA, in category H1; registration 140566. Excellent viscosity behaviour / temperature and highly resistant to oxidation and ageing. Appropriate and high-performance antioxidant, anti-wear and anti-rust additives.

Applications

For the food processing industries. Lubrication of hydraulic circuits and jacks (grape harvesters, wine presses, etc.) Also used for bearing lubrication (canning plants, bakeries, etc.)

Technical data

Viscosity at 40°C: 68 cst
