

HCB 300

Neat oil for micro-spraying

Description

Low-viscosity synthetic cutting fluid, formulated on an ester base, reinforced with an extreme pressure and anti-wear additive. For machining operations using micro-spraying, reducing the amount of lubricant and increasing cutting speeds.

Applications

For drilling, tapping, sawing, milling, etc. operations' Also used for cross-cutting aluminium profiles.

Technical data

Viscosity at 40°C: 29 cst
