

CENTRALES SAO-SAG

SAO-SAG central lubrication system

Description

The SAO (model for use with lubricating oil) and SAG (model for use with liquid greases) lubrication groups must be used exclusively as a source of pressurized lubricant sent to central lubrication circuits, with single pipes, which are equipped with single-line dispensers of the SKIE, SKIB and SKIC series, using SRK distribution cubes, or single-line dispensers of the SMIE, SMIB series integrated directly at the point to be greased.
